If the information is in content controlled by a business customer, such as its meeting recording, Vitel may direct the request to that customer and assist as required by the applicable DPA and law. Vitel will assess requests concerning information it controls under its Privacy Notice and Privacy Rights and Data Requests Notice.

Vitel will respond within the applicable legal period and provide any required notice of an extension, refusal, exception or appeal right. A request may require clarification or proportionate verification, but those steps will not be used to impose an unlawful barrier. Requests are generally free, subject only to legally permitted exceptions. Exercising a right will not result in unlawful discrimination.
